

## My dream school

In my dream school, the school is like a big town on an island where one can find lots of shops, supermarkets, a swimming pool, a tennis court, a big stadium and a movie theatre. There is a big place for studies, the classroom is equipped for the different subjects: there is a big self and a terrace for lunch. Pupils may reside on the campus. In the school there are a lot of teachers for the different subjects like a normal school and there are also teachers who teach some different subjects that pupils may take as an option (fashion class, cooking class...) The timetable is in relation to the activities that the pupils practice and in accordance with the number of lessons the pupils wish to take and also in accordance with the time one wishes to start and to finish the class. The lessons last forty-five minutes. As for the subjects there are lots of foreign languages and subjects linked to the professions one wish to exercise later. Pupils can speak in class but without disturbing others pupils. They can wear the clothes they like best. No one can leave the class before the end of the lessons. It's not allowed to access the sport complex at eight pm.

No one can be punished because in my ideal school there are no punishments. There is no homework, just for revising tests. In my school there is a uniform but it's not an obligation, pupils will not have to wear special outfits but those who wish to wear one can. And those who wish can wear a uniform, the one they want, to distinguish them from the others. The holiday last two months.

This is my ideal school...
